ABOUT ME

I like to see myself as a web developer with a designer's mind. In my professional work I tend to combine the best of two worlds, by developing high-end web solutions, whilst also making it look pretty. I have complete control over web languages like: Javascript, CSS, PHP and HTML5, and frameworks like React, NextJS and React Native

Besides developing I am a skilled designer, mainly using Adobe Photoshop or Adobe InDesign. During the creation of designs I focus on customer experience and keep the future coding-process in mind.

WORK EXPERIENCE

ROBERTWUBS.COM

FREELANCE REMOTE SR. DEVELOPER

Jun 2016 - Now

TECHTEAMER

BACK- & FRONT-END DEVELOPER

Oct 2017 - Now

TRIPPI

FOUNDER & DEVELOPER

May 2015 - Sept 2017

WINST.NL

WEB ALL-ROUNDER

Feb 2013 - Jan 2016

EDUCATION

BACHELOR OF SCIENCE

GAME DEVELOPMENT

2012 - 2019

ASSOCIATE OF SCIENCE

APPLICATION DEVELOPMENT

2007 - 2011

DESIGNING AND DEVELOPING NEW PLATFORMS

As a freelance web designer and developer I have worked on several projects, that ranged from creating an escrow trading service, to a social media platform for employees within a company. For the last year I have lead a small team of developers as a senior front-end developer, while creating a website using NextJS and React, with an accompanying mobile app using React Native. Example: <https://whynow.co.uk>

CREATING THE EDUCATION OF THE FUTURE

TechTeamer is a hungarian dedicated software development company. I worked as a front- and back-end developer for iTeach.world and WebRoom. iTeach allows teachers to deliver learning experiences to their students in an online learning environment. We worked closely with teachers and tailoring the system to their needs. More info: www.iteach.world

CREATING A NEW SOCIAL PLATFORM

At Trippi, a tech-startup I founded with two others, we created a new social platform where people would be able to connect with others from around the globe, by using a physical figurine which gets passed along from person to person. Besides business development, marketing and production, I was the main designer and programmer.

HELPING SMALL BUSINESSES ACHIEVE GREATNESS

At Winst.nl we trained small business-owners to make the most out of their business. I worked in the background on creating web tools, split-testing methods, Wordpress-plugins, designing event posters and flyers and much more.

CREATIVE PROGRAMMING

In this study I was taught advanced programming skills and design patterns. The curriculum also contained advanced physics and maths, mostly involving 3D calculations. Though I eventually did not graduate, I picked up a lot of tools and knowledge along the way.

BUILDING BASE KNOWLEDGE

During my study of Application Development, I was taught several programming languages like: PHP, MySQL, JavaScript, CSS, Java, C#, C++ and more. Topics like Linux, System Engineering and Cisco were also covered.

A COLLECTION OF FRAMEWORKS AND APPLICATIONS I'M WELL-VERSED IN

HOBBIES

PASTIMES ON DOWN-TIME

VOLUNTEERING

COC ZWOLLE
VOLUNTEER
2011 - 2014

HELPING TEENS UNDERSTAND THEMSELVES

For three years I worked as a bartender and point of contact at a cultural center in my hometown in the Netherlands. We would help 14 to 25-year olds with learning how to deal with accepting themselves in regards with, for example, mental health, gender identity, insecurities and other intricacies that make us human.
